

Amendments to the Specification:

Please replace the paragraph beginning at page 19, line 19 as shown below:

A | Referring to Figures 1A-1C, a first preferred embodiment of the present invention uses magnets as the one or more lock fittings 3. In Figure 1A, magnetic discs 24 positioned in recesses 22 of putter head 1 positively lock striking surface attachment 2 to putter head 1. In Figure 1B, the magnetic sheet 36 adhered to putter head 1 positively locks striking surface attachment 2 to putter head 1. Figure 1C illustrates the use of a first magnet ~~magnetic sheets~~ 32 and 40 on both the putter head 1 and a second magnet 40 on the striking surface attachment 2 to provide the positive lock. In this example, the first magnet 32 and second magnet 40 are magnetic sheets.
